54 Flexible composite material and process for preparing same.

57 A flexible composite material comprising a core composed of a blend of a thermoplastic resin fiber (3) and a reinforcing fiber (4), and a flexible sleeve (2) formed of a thermoplastic resin and surrounding the core. The composite material may be prepared by intermixing a thermoplastic resin fiber (3) and a reinforcing fiber (4) to obtain a core, and then extruding a thermoplastic resin over the core.
